and Knowledge
for schools and colleges

What would you like to see in the next Parents' Pack?

Carolyn Savage, Head of Apprenticeship Engagement

Dear Parents,

We were delighted to see such a positive response to the first ever edition of the Parents' Pack last month. To date, the resource pack has been downloaded over 3,500 times and has been shared widely across social media.

We would like to build on this success and ensure that even more parents have access to clear and unbiased information about apprenticeships. We recognise the importance of engaging with parents and would value your ideas and feedback. Please email your comments and suggestions to hello@amazingapprenticeships.com

We hope that you find November's issue useful and look forward to receiving your feedback.

Yours sincerely,

Carolyn Savage, Head of Apprenticeship Engagement
Education and Skills Funding Agency

The importance of keeping options open

Guidance for Parents

Consider all options

Your child has a number of different options when considering what they want to do when they leave school or college. It is important to take time to consider all options, even if they think they know what they want to do, so that they can make an informed decision about their future.

When can my child leave school?

All young people in England are required by law to continue in education or training until their 18th birthday. They may choose one of the following:

- Study full-time at school, college or with a training provider.
- Undertake full-time employment or volunteering combined with part-time study or training
- Secure an apprenticeship

Can my child apply for full-time study and an apprenticeship at the same time?

Depending on the age of your child, they are permitted to apply for different options e.g. school sixth form, college, university or an apprenticeship and then receive offers from all of these. This encourages them to research the opportunities available and to create choices. Then, when the time is right to make their selection, they will hopefully have a few different routes available to them.

Which employers offer apprenticeships?

Thousands of employers offer apprenticeships, from huge corporations to small businesses. All apprenticeships offer bespoke training and study programmes, making it a highly personal experience, regardless of whether your child is the only apprentice in the business or one of a large group.

Where can I see the vacancies available?

The Government provide a website called **Find an apprenticeship** www.gov.uk/apply-apprenticeship. This site lists many current apprenticeship vacancies and applicants can search and apply. You can set up an account to manage alerts so that you receive a text message or email when a job is added that you might be interested in.

Can my child apply for more than one apprenticeship at a time?

It is a really good idea to submit a number of applications to different employers so that they have a greater chance of securing an apprenticeship. Employers will advertise at different times throughout the year so it is important that your child understands that finding an apprenticeship can be a slightly more complicated process than applying to a full-time study course. They will need to go through a recruitment process and for some employers, this can take a number of months.

What if my child changes their mind?

Your child is allowed to change their mind. For example, if they decide to study full-time at a school sixth form but then feel it might not be right, they are permitted to apply for apprenticeships. Similarly, if your child secured an apprenticeship but decided that it wasn't right for them, it will be just like any other job and your child would be expected to work their notice period. They would then be able to go on to study or seek employment elsewhere and would be supported by their training provider.

Where can I find out more?

The **National Careers Service** offers advice about careers and skills in England.

Transport and logistics	Train driver 	Responsible for driving trains in a safe, punctual, economic manner over various routes.	3 (advanced)

7 questions to ask at university open days about Degree apprenticeships

Open days are a fantastic opportunity to find out more about apprenticeships. Asking these questions could help you to explore alternatives to full-time university to help you make an informed decision in the future.

	Questions to ask	Why should you ask this?
1	Is your university offering or planning to offer Degree apprenticeships?	Not all universities are offering Degree apprenticeships yet, but many do and will be able to tell you about the brilliant employers that they are working with and the range of exciting programmes that are emerging.
2	Which employers are you working with currently, what kind of apprenticeship vacancies do they have and when do they advertise?	This will give you an idea of which employers to research further and the number of vacancies they might be offering. Finding out about the date to apply is important as many employers with large programmes now focus on the opening date, rather than the closing date.
3	What is your university apprenticeship application process? Do you require a personal statement as well as the apprenticeship application?	Once you have secured your apprenticeship with the employer, many universities will require their degree apprentices to also submit a personal statement as part of their application to university. Knowing this in advance can be helpful so that you are aware of what to expect.
4	Does your careers service provide support with apprenticeship applications?	Many university careers services will provide applicants for their Degree apprenticeship programmes with support and guidance about the recruitment process.
5	What kind of delivery models are you offering?	Degree apprenticeship programmes are completely different to full-time university. You could attend day-release, online learning, block release or a blend of all of these. Ask about the different models available for each programme to get a feel for how it will work.
6	How much contact will the university have with the employer and apprentice?	The best apprenticeship programmes will insist on regular contact between the university, apprentice and their employer. This should lead to the best possible results for the apprentice as there will be a coherent understanding of what both the job and course demands of them.
7	How many Degree apprentices do you have currently? What are they saying about the programme?	This will give you a good idea about the work/life balance and will provide you with real-time feedback about how much they are enjoying the programme. Ask the university if any of their Degree apprenticeship students are available for a chat or have recorded any case studies that you can view.

Catch-up and live apprenticeship broadcasts

An insight into apprenticeships at top employers

Access the very latest apprenticeship information through live broadcasts – completely free of charge! Watch interviews with employers and their apprentices by joining live or watching on catch-up at a time to suit you.

Employer advice with Nestlé

Lucy Skrzeczkowski, Academy Pastoral Manager

at Nestlé UK&I gives tips on applying for a Nestlé apprenticeship

The Nestlé Academy application process is designed to find out if you have the strengths and values we're looking for. Do your research, but most importantly, be true to yourself and show genuine passion and enthusiasm.

STEP 1: ONLINE APPLICATION

There is no way to revise for the online application – we just need your personal details, and want to know about your preferences and what engages you.

TIP: Submit your application as soon as possible, and do not miss the deadline if there is one!

STEP 2: ONLINE TESTS

Following successful submission of your application, you will be invited to complete online tests, including a situational strengths test (how you would respond to certain situations), a numeracy test, and a social mobility questionnaire.

TIP: You can try out some sample Situational Strengths Test scenarios. There is no time limit to the numeracy test – work efficiently, but effectively. The social mobility questions are optional.

STEP 3: STRENGTHS-BASED VIDEO INTERVIEW

A Strengths-based Video Interview will include questions designed to identify your strengths in more depth, as well as some technical-based questions, so we can identify your passion for and knowledge of the function you're applying to.

TIP: The interview is automated, so there won't be an interviewer to speak to. Instead, the questions are presented on the screen and you record your answers using a webcam.

STEP 4: ASSESSMENT CENTRE

The Assessment Centre will be held at one of our Nestlé sites. You will be assessed in a series of strengths-based exercises, which may include group exercises, one-to-one interviews or presentations.

TIP: If you need to prepare anything before the day you will be briefed beforehand. Otherwise this is your opportunity to show us what you're made of, so be prepared and be yourself.

Higher and Degree apprenticeship vacancy listing 2018/19

The newly released listing is available now

The higher and Degree Apprenticeship Listing showcases thousands of vacancies from various employers starting in 2019. You can apply for these apprenticeships and a place at university at the same time.

Higher and Degree apprenticeships are widening access to the professions bringing together the very best of higher and vocational education. Degree apprenticeships give you the opportunity to attain a degree from some of our best universities whilst training in a top flight career. Tuition fees are paid for by your employer and the government and you will be learning and earning a salary from day one.
